

## 600 MW energy storage project in North America

ENGIE has completed 600 MW combined solar and battery storage project and develops, constructs, and operates offshore and onshore wind farms, solar farms, energy storage facilities, renewable hydrogen and green fuels facilities, and bioenergy plants. ENGIE, Meta Expand PPAs with New 600-MW Solar Project The project will be the single largest asset in ENGIE's more than 11 GW operating and in construction portfolio consisting of solar, wind, and battery storage assets in North America. Utility Wants to Double Battery Storage to 600-MW at Site Next to Xcel Energy plans to build the Midwest's largest battery energy storage site at the Sherco Energy Hub in central Minnesota. It wants to double the amount of battery storage. Xcel Energy to build Upper Midwest's largest battery energy storage site MINNEAPOLIS (Nov. 3, ) -- Xcel Energy plans to build the Midwest's largest battery energy storage site at the Sherco Energy Hub in central Minnesota. The project is among a series of investments that will allow ENGIE and Meta expand Power Purchase Agreements to more than 11 GW. The project will be the single largest asset in ENGIE's more than 11 GW operating and in construction portfolio consisting of solar, wind and battery storage assets in North America. Meta Buys 100% of Renewable Energy from New \$900 Million Project The latest PPAs cover Engie's new 600 MW Swenson Ranch Solar project in Stonewall county, Texas. It is expected to be Engie's single largest asset in its 11 GW portfolio. Strata Clean Energy Breaks Ground on 600 MWh Justice Energy Storage The 150 MW / 600 MWh project is expected to be operational in April , delivering four hours of battery capacity that can power roughly 24,000 homes. Once completed, Justice will play a major role in Strata Clean Energy's commitment to fostering a resilient and decarbonized energy future. Located near Phoenix, this innovative battery storage facility marks a milestone for EDF Renewables. EDF Renewables builds 375MW solar-plus-storage EDF Renewables North America has begun operations on a 375MW/600MWh solar-plus-storage project in California. The company announced last week (31st January) that the Desert Quartzite project has completed 600 MW combined solar and battery storage project and develops, constructs, and operates offshore and onshore wind farms, solar farms, energy storage facilities, renewable hydrogen and green fuels facilities, and bioenergy plants. Xcel Energy to build Upper Midwest's largest battery storage site MINNEAPOLIS (Nov. 3, ) -- Xcel Energy plans to build the Midwest's largest battery energy storage site at the Sherco Energy Hub in central Minnesota. The project is among a series of investments that will allow Strata Clean Energy Breaks Ground on 600 MWh Justice Energy Storage The 150 MW / 600 MWh project is expected to be operational in April , delivering four hours of battery capacity that can power roughly 24,000 homes.
