How many solar projects are there in Albania? So far, the solar auctions have produced two PV projects with a total of 240 MW. Albania reports 7 GW of wind and solar potential and is looking into developing offshore wind in the Adriatic Sea. The availability of renewable energy resources in Albania for some renewable energy technologies is less studied than for others. What is the largest solar power plant in Albania? In late the 140MW Karavasta solar power plant was completed, having taken Voltalia of France 15 months to build, it is the largest in Albania to date. A 100 MW solar power project called Spitalla in Durrës area is planned to be built next. Albania has enormous potential for electric energy from wind power. Who regulates the power sector in Albania? The most significant institutions in setting policy and regulation in the power sector in Albania are the Ministry of Infrastructure and Energy ("MIE") and the Energy Regulatory Authority ("ERE"). Where can a wind turbine be used in Albania? The coastal lowlands and Southern, Eastern, and Northern Albania mountains are excellent areas for wind turbines. The wind speed is 8-9 m/s in many areas of Albania. The first wind power auction took place in summer with three bidders awarded 222 MW capacity. Geothermal energy could also be used in Albania. Why is Albania launching a new phase of energy security? The country is now entering a new phase -- one that includes solar, wind, and international partnerships aimed at building long-term energy security. Hydropower has historically covered more than 90 percent of Albania's electricity generation. The country's rivers and mountain terrain made it a natural choice. What is the legal framework governing the energy sector in Albania? The Albanian legal framework governing the energy sector, including the promotion and use of renewable energy sources (RES), has undergone significant developments in the last decades. Renewable energy in Albania includes biomass, geothermal, hydropower, solar, and wind energy. [1] Albania relies mostly on hydroelectric resources, therefore, it has difficulties and shortages when water levels are low. The renewable energy share in Albania is predominantly hydropower of which accounts for 95% of all generating capacity, with the remaining divided between solar (1%) and crude oil (4%). The remaining share of supply comes from

Through strong partnerships, cutting-edge expertise, and a commitment to sustainability, CWP is shaping the future of Albania, often dubbed "Europe's hidden gem for renewable energy," is making significant strides in wind and solar energy storage projects. With its abundant sunshine, coastal wind corridors, and government incentives, the country has become a hotspot for green energy investments. But how exactly

Albania OverviewHydropowerWind and Solar PowerSolarLeading Sub-SectorsOpportunitiesAlbania is a net importer of electricity; power supply security is a challenge. Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable.
