

## Austria Energy Storage Project Manufacturing Project

Austria's Climate and Energy Fund has launched a EUR17.9 million tender program for medium-sized electricity storage systems with net capacities of between 51 kWh and 1 MWh. The funding is intended for new construction and expansion of existing battery storage systems. Developer NGEN Smart Grid Systems has completed a 10.3MW/20.6MWh standalone battery storage project in Austria, the largest in the country, it claimed. The Slovenia-headquartered firm has installed the project in Ardnoldstein, which is now grid-connected and participating in the electricity market. The storage facility featuring six Megapack 2XL systems from Tesla was built over a seven-month period in the vicinity of a wood gas generator and a solar farm. The project has a power output of 12 MW and storage capacity of 24 MWh. Slovenian company NGEN has switched on what it claims to be the Austrian authorities have offered EUR17.9 million (\$19 million) to fund medium-sized electricity storage systems, with EUR10 million from the climate action protection ministry and EUR7.9 million from the European Agricultural Fund for Rural Development (EAFRD). Austria is launching funding for NGEN commissioned Austria's largest battery energy storage system (BESS). It installed it in record time - just seven months. Located in F&#252;rstenfeld, in the country's southeast, the facility has 24 MWh in capacity and a maximum output of 12 MW. The successful endeavor is part of the company's Austria's Federal Ministry for Economic Affairs announced plans to launch a new funding round on June 23, , offering up to 20% "Made in Europe" bonuses for small-scale solar photovoltaic (PV) and energy storage projects using European-manufactured components. The initiative, part of the 'Largest' battery storage project in Austria completeDeveloper NGEN Smart Grid Systems has completed a 10.3MW/20.6MWh standalone battery storage project in Austria, the largest in the country, it claimed.
