

What are emergency responder radio coverage systems (errcs)? Our Emergency Responder Radio Coverage Systems (ERRCS) are designed to support public safety emergency response and first responders using a wide range of two way radio frequency (RF) spectrums: Does EMS have a 911 system? We have fully incorporated the 911 System in our EMS station, including speakers and lights in all rooms, training room, bunk rooms, garage bay in several locations, bathrooms, etc.; there is nowhere in the station you can go without knowing we have a dispatched call. What is enhanced communication? Enhanced communication means that emergency department teams "have all of their [patients] information and their EKG's before they arrive and our teams are waiting with the equipment they need for that patient" Dallas Griggs, Executive Director West Tennessee of Heart & Vascular ". FDNY | ARCS | NYC | Xtech Systems inc. Xtech Systems Inc. has been providing high-quality radio communication equipment for over 15 years.
