Construction unit of wind and solar complementary communication base st

The communication base station comprises a bracket component, a transmitting tower and a power supply system, wherein the bracket component is a steel structure frame and comprises counterweight blocks, a base, straight rods, inclined supports, a sleeve support and a bracket; the bottom surface of the base positioned on a lower layer is connected with the counterweight blocks; the four corners of the upper plane of the base are connected with the vertical straight rods through the inclined supports; the bottom of the vertical transmitting tower is connected to the middle of the long side of the base; the umbrella framework-shaped sleeve support is sleeved on the waist of the transmitting tower and connected with the straight rods; the power supply system comprises wind-driven generators, a solar panel and a storage battery arranged in a machine room; the wind-driven generators are arranged on the tops of the straight rods; the machine room is arranged on the base; the bracket is connected between the straight rods of the bracket component; the solar panel is arranged on one side of the bracket, which faces the sun; and a complementary circuit is formed by the solar panel and the wind-driven generators and inputs electric energy into the storage battery arranged in the machine room. Hybrid Energy Mobile Wireless Telecom Base StationDiscover the power of our Hybrid Energy Mobile Wireless Station, offering seamless, energy-efficient telecom base site solutions. Designed for versatility with solar, wind, and diesel Communication base station wind and solar complementary The wind-solar-diesel hybrid power supply system of the communication base station is composed of a wind turbine, a solar cell module, an integrated controller for hybrid energy Communication base station based on wind-solar complementation[] Aiming at the deficiencies of the existing technology, the present invention provides a communication base station based on wind-solar hybrid, which has the advantages of easy Communication base station wind and solar complementary Mar 28, · This article aims to reduce the electricity cost of 5G base stations, and optimizes the energy storage of 5G base stations connected to wind turbines and photovoltaics. Application of wind solar complementary power In addition, solar energy and wind energy are highly complementary in time and region. The island scenery complementary power generation system is an independent power supply system with good Operating communication base stations with wind and solar This paper describes the design of an off-grid wind-solar complementary power generation system of a 1500m high mountain weather station in Yunhe County, Lishui City. What are the wind and solar complementary equipment for What are the wind and solar complementary equipment for network Photoelectrical complementary portable base station for communication Description technical field [] The Hybrid Energy Communication Base Site SolutionsHuijue Group is at the forefront of providing reliable solar energy solutions for communication base stations. Their solar power systems are engineered to deliver high efficiency with low starting wind speeds CN202249000U The invention relates to a wind-solar complementary integrated base station with a tower room structure, which comprises a tower mast, a base station machine room, a solar powerHybrid Energy Mobile Wireless Telecom Base StationDiscover the power of our Hybrid Energy Mobile Wireless Station, offering seamless, energy-efficient telecom base site solutions. Designed for

versatility with solar, wind, and diesel Communication base station wind and solar complementary communication The wind-solar-diesel hybrid power supply system of the communication base station is composed of a wind turbine, a solar cell module, an integrated controller for hybrid energy Application of wind solar complementary power generation In addition, solar energy and wind energy are highly complementary in time and region. The island scenery complementary power generation system is an independent power Hybrid Energy Communication Base Site SolutionsHuijue Group is at the forefront of providing reliable solar energy solutions for communication base stations. Their solar power systems are engineered to deliver high CN202249000U The invention relates to a wind-solar complementary integrated base station with a tower room structure, which comprises a tower mast, a base station machine room, a solar power
