

## Cyprus New Energy Storage Project

In May, Cyprus brought its first significant battery energy storage system (BESS) online. The project marks a major step toward enhancing the country's energy infrastructure, aligning with its goals for renewable energy integration and grid stability. Cyprus is set to expand its energy infrastructure with new storage facilities and power generators, Giorgos Petrou, president of the Cyprus energy regulatory authority (Cera) confirmed on Wednesday. According to a report on StockWatch, Petrou revealed that an additional proposal is under review for In May, Cyprus brought its first significant battery energy storage system (BESS) online. The project marks a major step toward enhancing the country's energy infrastructure, aligning with its goals for renewable energy integration and grid stability. The BESS project is a partnership between Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country. Cyprus Energy Regulatory Authority (CERA) announced the approval earlier this week (18 June) of three projects which will be owned and operated The government has approved the construction and operation of an energy storage unit in the community of Psevdas, Larnaca. The facility will have a capacity of 59 MW and 120 MWh, aiming to support the grid during periods of low renewable energy production. The unit will operate with lithium Cyprus is set to build its first large-scale electricity storage system within the next 16 months, according to Energy Minister George Papanastasiou. This move is key to supporting renewable energy sources like solar power, which currently face challenges due to the lack of storage. The Electricity New energy storage and power plant projects Cyprus is set to expand its energy infrastructure with new storage facilities and power generators, Giorgos Petrou, president of the Cyprus energy regulatory authority (Cera) confirmed on Cyprus approves 120MW battery storage systemCyprus will establish its first large-scale electricity storage infrastructure within the next 16 months, Energy Minister George Papanastasiou announced at the Green Agenda Cyprus Summit in Cyprus Launches First Major Battery Energy In May, Cyprus brought its first significant battery energy storage system (BESS) online. The project marks a major step toward enhancing the country's energy infrastructure, aligning with its goals for Cyprus aims to complete energy storage system by, launch The government plans to complete a new energy storage system, along with storage installations at two Electricity Authority of Cyprus (EAC) power plants, by June, Larnaca energy storage project welcomed as first stepThe government has approved the construction and operation of an energy storage unit in the community of Psevdas, Larnaca. The facility will have a capacity of 59 MW Green light for one of first standalone battery investments in CyprusThe Electricity Authority of Cyprus plans to upgrade the nearby Psevdas high-voltage substation by to integrate the standalone battery system. Construction work is New energy storage system to support renewable Cyprus is set to build its first large-scale electricity storage system within the next 16 months, according to Energy Minister George Papanastasiou. This move is key to supporting renewable energy sources Cyprus Approves Battery Storage Project with Eight New One of Cyprus's first standalone battery energy storage systems (BESS) has received environmental clearance from the Department of Environment, with the project The

## Cyprus New Energy Storage Project
