

Energy Storage Project Power Supply Bureau

How will state energy storage programs impact energy storage growth? With nearly \$2B in approved incentives, the programs will stimulate expansive energy storage growth state-wide and further drive the State towards achieving its goal of 6 GW of energy storage deployed by . How will a 100MW battery energy storage system work? The facility will serve as a large-scale battery energy storage system capable of charging from, and discharging into, the New York power grid. When fully functional, the 100MW battery energy storage project will be able to discharge electricity to the grid particularly during peak demand. What are New York state's energy storage goals? Learn more about installed energy storage projects and New York State's progress toward its energy storage goals. New York's Climate Leadership and Community Protection Act (Climate Act) codified a goal of 1,500 MW of energy storage by and 3,000 MW by . Are battery energy storage systems regulated in New York City? Battery energy storage systems in New York City are rigorously regulated, with oversight from the safety industry, federal, state, and local authorities. All code, location, spacing, and other local requirements must be met. How many MW of energy storage will New York have? Two affiliated New York utilities are soliciting at least 310 MW of utility-scale energy storage resources across multiple smaller portfolios that can connect to the state grid by the end of on contracts of up to 15 years. How will energy storage impact New York? Storage will increase the resilience and efficiency of New York's grid, which will be 100% carbon-free electricity by . Additionally, energy storage can stabilize supply during peak electric usage and help keep critical systems online during an outage. All of this while creating an industry that could employ at least 30,000 New Yorkers by . Energy Storage Program Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage, available incentives, and more. NYCEDC Advances Green Economy Action Plan The facility will serve as a large-scale battery energy storage system capable of charging from, and discharging into, the New York power grid. When fully functional, the 100MW battery energy storage project will be able to New York Battery Energy Storage System Guidebook for The Battery Energy Storage System Guidebook (Guidebook) helps local government officials, and Authorities Having Jurisdiction (AHJs), understand and develop a battery energy storage January State of Charge With nearly \$2B in approved incentives, the programs will stimulate expansive energy storage growth state-wide and further drive the State towards achieving its goal of 6 GW of energy storage deployed by . NEW YORK ENERGY STORAGE POLICY Storage Policy The law also formally adopted the storage goal referenced by Gov. Cuomo in his executive directive, namely that the NY PSC adopt an energy storage goal of installing up to 3,000 MW New York PSC adopts energy storage road map Hochul announced plans in January to double New York's previous energy storage goal of 3 GW by . The state released a draft road map in December showing how it would achieve its Energy Storage for New York State Information and funding opportunities for residential, commercial, and bulk energy storage. Resources and technical assistance to help make informed decisions when managing local energy storage projects. How NYS is New York State large-scale energy storage support Regulators earlier this month approved a scheme to support grid-

scale energy storage facilities, aligned with New York's 6GW by policy target. PSC Authorizes Construction of 100 MW Battery Storage The project will help displace fossil fuel-fired generation when the demand for power is highest. The 100 MW East River Energy Storage System will hold enough electricity to power more STATE OF STORAGE IN NEW YORK Enacted in , Public Service Law (PSL) §74 directed the Public Service Commission (Commission) to establish a statewide energy storage goal and programs that will enable the Energy Storage Program Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage, available incentives, and more. NYCEDC Advances Green Economy Action Plan with Support of The facility will serve as a large-scale battery energy storage system capable of charging from, and discharging into, the New York power grid. When fully functional, the January State of Charge With nearly \$2B in approved incentives, the programs will stimulate expansive energy storage growth state-wide and further drive the State towards achieving its goal of 6 New York PSC adopts energy storage road map detailing path to Hochul announced plans in January to double New York's previous energy storage goal of 3 GW by . The state released a draft road map in December Energy Storage for New York State Information and funding opportunities for residential, commercial, and bulk energy storage. Resources and technical assistance to help make informed decisions when managing local New York State large-scale energy storage support scheme Regulators earlier this month approved a scheme to support grid-scale energy storage facilities, aligned with New York's 6GW by policy target. STATE OF STORAGE IN NEW YORK Enacted in , Public Service Law (PSL) §74 directed the Public Service Commission (Commission) to establish a statewide energy storage goal and programs that will Energy Storage Program Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage, available incentives, and more. STATE OF STORAGE IN NEW YORK Enacted in , Public Service Law (PSL) §74 directed the Public Service Commission (Commission) to establish a statewide energy storage goal and programs that will
