

## Energy storage battery production in Croatia

The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the deployment of a VPP platform, allowing real-time balancing of electricity supply and demand. The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established joint-stock company developing a greenfield battery energy storage system (BESS) and virtual power plant (VPP) in Sibenik, Croatia. The Croatian government has allocated almost EUR20 million (\$23.2 million) of European Union Modernization Fund grants to help complete a 60 MW/120 MWh battery energy storage system (BESS) at an aluminum rolling mill site days after plans were revealed for a utility-scale battery storage system in Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a significant step in modernising the country's energy infrastructure. The EUR60 million investment, co-financed by the European Bank for Reconstruction and Development Zagreb, 8 July - Renewable Energy Sources of Croatia (RES Croatia) and the European Bank for Reconstruction and Development (EBRD) are collaborating on the development of an expert study titled "Identification of Congestion Locations in the Electricity Grid and Battery Energy Storage Needs in Croatia first grid-scale battery storage and virtual power plantThe development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the deployment of a VPP platform, allowing real-time Plans announced for 245 MWh of battery storage projects in The Croatian battery news came in the wake of plans for a standalone utility-scale battery storage system in Serbia. The office of the Mayor of Leskovac revealed plans for a 125 Croatia building first grid-connected battery storage near SibenikCroatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a significant step in modernising the country's Croatia battery storage: Impressive 60 MW System BackedThe project involves the construction of a sophisticated 60 MW battery energy storage system (BESS) combined with a virtual power plant (VPP) in Sibenik. Launch of the Study on the Use of Battery Storage in Croatia's The study will take into account the broader regional context and the accelerated growth of renewable energy sources, not only in Croatia but throughout Southeast Europe, FER Takes Key Role in Battery Storage Study for Croatia's Modern energy storage systems will be key to meeting the European Union's targets. This study will contribute to supply security, cost reduction, and increased energy Croatia to earmark EUR 500 million for batteriesThe Government of Croatia is preparing EUR 500 million for the installation of batteries for storing renewable energy. Minister of Economy and Sustainable Development Damir Habijan said Croatia is ready for EBRD invests EUR16.8mn in Croatia's first large-scale battery The EBRD has invested more than EUR5bn in 273 projects in Croatia to date, focusing on supporting reforms, leveraging EU membership benefits, and modernising public-sector enterprises. EBRD Backs Croatia's Clean Energy Transition with EUR16.8 Million The European Bank for Reconstruction and Development (EBRD) has announced a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established joint Croatia launches major battery
