

## French lead-carbon energy storage power generation project

TAGENERGY, a global leader in low-carbon energy solutions, launches construction of France's largest battery energy storage platform (France, Marne). This landmark project marks the start of an ambitious expansion plan for , with accelerated solar and storage development TAGENERGY, a global leader in low-carbon energy solutions, launches construction of France's largest battery energy storage platform (France, Marne). This landmark project marks the start of an ambitious expansion plan for , with accelerated solar and storage development activities. TESLA, a TagEnergy will develop and manage the Cernay-l&#232;s-Reims project, which is scheduled for grid connection in late . It will have a storage capacity nearly five times larger than France's current largest operational battery. Lisbon-headquartered renewable energy company TagEnergy has launched TotalEnergies has deployed a Saft lithium-ion (Li-ion) battery energy storage system (ESS) at Dunkirk, Northern France in a frequency response project that will serve as a model for other sites. The 25 megawatt-hour (MWh) facility at Dunkirk is the largest ESS in France and is part of We are aiming to develop 5 to 7 gigawatts (GW) of gross electricity storage capacity worldwide by , thanks in particular to battery-based energy storage systems. To achieve this ambition, we are harnessing the technological expertise of our affiliate Saft. Learn more about our achievements and Global energy storage capacity was estimated to have reached 36,735MW by the end of and is forecasted to grow to 353,880MW by . France had 90MW of capacity in and this is expected to rise to 359MW by . Listed below are the five largest energy storage projects by capacity in Total launches a battery-based energy storage project in Mardyck, at the Flandres Center, in Dunkirk's port district. With a storage capacity of 25 megawatt hours (MWh) and output of 25 MW of power, the new lithium-ion energy storage system will be the largest in France. It will be used to provide TagEnergy launches construction of France's TAGENERGY, a global leader in low-carbon energy solutions, launches construction of France's largest battery energy storage platform (France, Marne). This landmark project marks the start of an ambitious TagEnergy to build France's largest battery, 240MW/480MWhLisbon-headquartered renewable energy company TagEnergy has launched construction of France's biggest battery energy storage system (BESS). Tesla will contribute TotalEnergies installs France's largest energy storage systemEnergy storage is an important element in achieving TotalEnergies' ambition to become the responsible energy major. Our goal is for low-carbon energy operations to account for 15 to 20 Battery-Based Energy Storage: Our Projects and In May , we launched our largest European battery-based energy storage project at the Antwerp platform in Belgium. With its 40 containers, the site will develop a capacity of 75 MWh, which is equivalent Top five energy storage projects in France Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database. GlobalData uses proprietary data and analytics to Largest Battery-based Energy Storage Project in Total launches a battery-based energy storage project in Mardyck, at the Flandres Center, in Dunkirk's port district. With a storage capacity of 25 megawatt hours (MWh) and output of 25 MW of power, the List of 3 major battery storage developers from FranceBy combining their expertise within one company, EDF Power Solutions is able to develop

## French lead-carbon energy storage power generation project
