

## Georgia Energy Storage Project

Where are Georgia Power's new battery energy storage systems located? Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties. Will Georgia Power offer more battery energy storage projects? In that filing, Georgia Power signaled its intention to solicit bids for more storage- another 500 MW- in the near future. Battery energy storage projects are popping up all over the U.S., which added nearly 4 GW of storage capacity in the second quarter of this year alone, according to a recent report. What is an energy storage project? An energy storage project is a cluster of battery banks (or modules) that are connected to the electrical grid. These battery banks are roughly the same size as a shipping container. These are also called Battery Energy Storage Systems (BESS), or grid-scale/utility-scale energy storage or battery storage systems. What do we know about Georgia Power Projects? Georgia Power included attachments with information and data on each of the proposed projects, but since they contained "sensitive terms and conditions" and cost information, they were nearly entirely redacted from public disclosure- deemed "trade secrets." Here's what we do know about those projects: What is the Georgia Power Company Integrated Resource Plan Update ? Earlier this month, Georgia Power Company submitted its Integrated Resource Plan Update ( IRP Update) to the Georgia Public Service Commission, which includes an Application for Certification for four battery energy storage systems totaling 500 MW. Does Georgia Power support Customer-Sited solar? Georgia Power is also committed to supporting customer-sited generation resources to meet the state's growing energy needs. The IRP includes two customer expansions of BESS programs including enhancements to the Customer Connected Solar Program and launching a new Customer-Sited Solar Plus Storage Pilot. Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties. Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties. Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties. The BESS projects were authorized by the Georgia Public Service Commission (PSC) through The 200MW system aims to rapidly dispatch stored energy over a four-hour period, enhancing the reliability and resilience of the electric grid. Credit: harhar38/Shutterstock . Georgia Power has initiated the construction of a 200MW (megawatt) battery energy storage system (BESS) in Twiggs In a continued effort to limit its use of fossil fuels to mitigate peaks, Georgia Power Company is adding a whole mess of new BESS. Earlier this month, Georgia Power Company submitted its Integrated Resource Plan Update ( IRP Update) to the Georgia Public Service Commission, which includes Georgia Power has started construction on a new standalone battery storage system, a 200 MW project in Twiggs County, Georgia. This project marks a significant milestone in Georgia Power's efforts to enhance

## Georgia Energy Storage Project

grid reliability, integrate renewable energy, and support the state's growing energy needs. Georgia Power announced that it has started construction on a new 200-megawatt (MW) battery energy storage system (BESS) in Twiggs County, southeast of Macon, Ga. The project was selected through competitive processes resulting from the Integrated Resource Plan (IRP) Update and was approved. Georgia Power has commenced construction on a 200MW battery energy storage system (BESS) in Twiggs County, enhancing the state's energy grid. Approved by the Georgia Public Service Commission, this initiative aims to efficiently store excess energy for peak use. The project is part of a broader construction now underway on 765 MW of new Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Georgia Power commences construction of 200MW BESS. Georgia Power has initiated the construction of a 200MW (megawatt) battery energy storage system (BESS) in Twiggs County, southeast of Macon in the US state. The Here's where Georgia is installing 500 MW of new battery energy storage. Although the state is just starting to explore the possibilities of battery energy storage, Georgia has been a hotbed for renewable energy development since the passage of Georgia battery storage: Impressive 200 MW Georgia Power has started construction on a new standalone battery storage system, a 200 MW project in Twiggs County, Georgia. This project marks a significant milestone in Georgia Power's efforts to Georgia Power Begins Construction on 200 MW Battery Storage Georgia Power begins construction on 200 MW battery energy storage system in Twiggs County to boost grid reliability and support renewable energy integration. Battery Energy Storage Construction by Georgia Power Georgia Power has commenced construction on a 200MW battery energy storage system (BESS) in Twiggs County, enhancing the state's energy grid. Approved by the Georgia Public Service Georgia Power, BESS, Battery Energy Storage Systems, Georgia Power identifies sites for 500 MW of new battery energy storage systems to enhance grid stability and manage peak demand, leveraging existing infrastructure to Peach State power play: Georgia's blueprint for Georgia is on track to deploy more than 1GW/4GWh of utility-scale storage by , outpacing every other Southeastern state. Driven by economic growth and evolving grid requirements, Georgia's energy Georgia installs first battery storage system in Georgia Power will soon flip a switch and turn on its latest clean energy construction project: battery storage. When millions of Georgians begin their day by turning on lights, the coffee machine, take a Georgia Power Begins Construction of Newest Battery Storage Syst 200 MW BESS to help deliver reliable capacity for customers and meet energy needs in the winter of - ATLANTA, GA / ACCESS Newswire / October 23, / Construction now underway on 765 MW of new battery energy storage Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Here's where Georgia is installing 500 MW of new battery energy storage. Although the state is just starting to explore the possibilities of battery energy storage, Georgia has been a hotbed for renewable energy development since the passage of
