

## How to load battery packs into containers

What are the lithium-ion batteries in containers guidelines? Sign up here for free to receive articles directly into your inbox. The Lithium-ion Batteries in Containers Guidelines seek to prevent the increasing risks that the transport of lithium-ion batteries by sea creates, providing suggestions for identifying such risks and thereby helping to ensure a safer supply chain in the future. How do you ship lithium ion batteries? Goods must be labelled as "Lithium Ion Battery" or "Lithium Metal Battery" and include appropriate shipping marks and hazard labels. Lithium batteries must have the correct documentation - including a Dangerous goods declaration, air waybill, and packing list. Can you Ship Lithium-ion Batteries Internationally? Can You ship lithium batteries in an ocean container? If the vehicle can be handled in a non-upright position, it must be secured in strong, rigid outer packaging. For many carriers, certain lithium batteries are totally off limits. Container shipping giant MSC recently reminded its customers that it won't ship lithium batteries in an ocean container if they've been used or damaged. How do you transport a lithium battery? Packaging and Labeling Use Approved Packaging: Transport lithium batteries in packaging specifically designed and approved for batteries. This helps prevent physical damage and minimizes the risk of short-circuiting. Insulate and Protect: Ensure batteries are insulated and protected from physical damage during transit. How should a lithium battery pack be shipped? Typically, lithium battery packs should be shipped at a state of charge about 30% to minimize the risk of thermal runaway. Terminal Protection: Cover battery terminals with insulating tape or use terminal caps to prevent accidental short-circuiting.
