

## How to replace the battery of the base station power supply

To replace the batteries in your power station, start by turning it off, unplugging it, and opening the casing carefully, following the manufacturer's instructions. Safely disconnect and remove the old batteries, inspecting for damage and ensuring they're fully discharged. The Base Station takes four (4) 1.2V, 1300mAh nickel-metal hydride (NiMH) rechargeable batteries. Regular alkaline batteries should never be inserted into the Base Station, as they may damage the device. Once you have acquired the necessary NiMH rechargeable batteries, you can follow the steps
