

Huawei's worst solar panels

The nice thing about panels is that they seem to be commodity nowadays. We're not hearing horror stories about certain brands (at least from what I've seen). If you want top notch: Panasonic, REC, SunPower - though I'm not a fan of sunpower due to the costs associated with it. Solar photovoltaic technology is one of the great developments of the modern age. Improvements to design and cost reductions continue to take place. How efficient will it become? When will it become so affordable that it's accessible to everyone? How are other energy industries having an effect on

The Chinese firm is now a passive member of the group, but another solar company is demanding an explanation from SolarPower Europe. While it is better known as a telecom giant, Huawei is also a leader in manufacturing inverters, which turn solar panels' electricity into current that flows into the U.S. officials have launched a comprehensive security review of Chinese-made renewable energy devices, particularly solar power inverters, after discovering unauthorized communication components such as hidden cellular radios. These devices, described as 'kill switches,' reportedly have the US Experts Warn 'Rogue' Devices Found in Chinese Solar Power Inverters Could Trigger Widespread Blackouts, Report Says -- Effectively a 'Built-in Way' to Destroy the Grid. Are You Prepared? US experts warn 'rogue' devices found in Chinese solar power inverters could trigger widespread blackouts In a remarkable turn of events, SolarPower Europe, the leading trade body representing the European solar industry, reversed its earlier exclusion of Chinese tech giant Huawei from its membership. The reversal came after a months-long saga marked by an anti-corruption investigation and mounting Cyber officials fear the Chinese tech giant's grip on energy networks. According to research by trade body SolarPower Europe, Chinese firms control approximately 65 percent of the total installed power in the solar sector.
