What is Huawei power-m? Huawei's home power solutions, whether for battery storage or getting the entire home off grid, provide safe and efficient ways for African households to harness renewable resources. Power-M is Huawei's advanced digital back-up power solution that is geared towards meeting power supply needs of modern homes. How can Huawei help tackle decarbonisation?" As decarbonisation takes place, innovative players like Huawei want to collaborate with governments to find long-term solutions to issues like energy poverty and security." One way to do this is with tools that change how energy is used at the household level. 55% of all energy on the continent is used to run homes. How can Huawei improve energy performance? Huawei can address this with optimisers that boost performance by up to 30%. Smart Guard accessories enable intelligent energy management with features like remote scheduling across devices. Does Huawei have a warranty?" Huawei's home energy products come with a 10-year warranty. The ability to run remote diagnostics means that you'll never need to have a technician at your house for a repair," says Lusson. "We also have a policy of providing full replacement when warranty issues are found," he adds. How long does a power outage last in East Africa? These outages go on for an average of six hours according to World Bank Enterprise Surveys. "Solar resources are abundant on the continent and households should be ready to take advantage of this," says Nick Lusson, Vice President of Huawei Digital Power East Africa.
