

## Huawei Communication Battery Connected to Inverter

In this video, we demonstrate step-by-step troubleshooting methods to help you quickly identify and fix the cause of the communication failure between your Huawei inverter and connected battery. ? In this guide, you'll learn: What causes the abnormal The DC-DC converter has a COM port on both sides. The communication cable of the inverter can connect to the COM port on either side. You can choose a COM port based on the installation position. The COM port on the right side is recommended. The COM ports on the two sides of the DC-DC converter This alarm indicates abnormal communication between the battery and inverter -- a common issue that can interrupt normal system operation. more Seeing a Huawei Inverter Alarm ? This alarm indicates abnormal communication between the battery and inverter -- a common issue that can interrupt I am currently using a SAKO 6kW inverter in combination with a Huawei lithium battery. However, I am encountering an issue where the BMS connection between the inverter and the battery is not successful. I would appreciate your support in resolving this issue. Kindly advise on the correct Applicable inverters: SUN2000-2-6KTL-L1 SUN2000-3-10KTL-M1 Hybrid system components: SUN2000 Inverter Huawei Backup Box (optional) 1 phase - Backup Box-B0 3 phase - Backup Box-B1 Huawei Luna Power Module (BMS) Huawei Luna Ba The battery has a IN and OUT RJ45 com port and I have the pin outs to this. It provides 4 wire RS485 coms. Baud rate: bit/s. It also provides positive and negative can, which match the pin out on the BMS can of the multiplus. I only have the one battery at this stage and don't see a need for Figure C-1 Insertion direction of a battery communications terminal Figure C-2 Inverter connected to two batteries (method 1) Figure C-3 Inverter connected to two batteries (method 2) Huawei Inverter Alarm | Fix Abnormal Communication In this video, we demonstrate step-by-step troubleshooting methods to help you quickly identify and fix the cause of the communication failure between your Huawei Need Support to connect Huawei lithium battery ESM-48150B1 Kindly advise on the correct communication protocol, wiring configuration, and any necessary firmware or settings required to ensure successful BMS communication between Huawei battery integration with Multiplus When compatible batteries are connected, the battery controls charge rates, discharge rates. Correct values should be set in the multi, in case there's a problem with the How to solve Inverter & battery Communication If you are unable to view battery information on the APP or display screen after connecting the inverter with the battery (as shown in the photo Below), It is very likely due to a communication issue between the (Optional) Cascading Batteries For details about the wiring diagram for connecting the inverter to batteries, see Wiring Between the Inverter and Batteries.External Electrical Connections of the Battery Connection Diagram (Inverter + Two Batteries) The DC-DC converter has a COM port on both sides. When batteries are connected in parallel, you are advised to connect the inverter to the Huawei Inverter Alarm | Fix Abnormal Communication Between Battery In this video, we demonstrate step-by-step troubleshooting methods to help you quickly identify and fix the cause of the communication failure between your Huawei How to solve Inverter & battery Communication issues If you are unable to view battery information on the APP or display screen after connecting the inverter with the battery (as shown
