China's tech giant claims 1,800-mile range for solid-state EV battery Huawei promises that its battery technology could deliver around 1,864 miles of range and achieve a 10% to 80% charge in under five minutes. Huawei says its new solid-state EV battery can give you 1,800 miles of range. Huawei is the latest in a growing list of automakers and tech companies that are exploring the possible benefits of fitting an EV with solid-state batteries, with the likes of BMW, Enabling Smart Charge and Smart Battery Capacity. Learn about 'Enabling Smart Charge and Smart Battery Capacity'. Find all usage guide, troubleshooting tips and resources for your HUAWEI product. Huawei Electric Car Battery Gives 3000Km Range If Huawei introduces this battery to practical use in a short while, it could inspire many car buyers to finally switch from diesel or petrol to electric. A km range and five-minute charge could make EVs more pragmatic. Huawei's 3,000km, 5-minute charge battery patent just Huawei doesn't even make EV batteries, you might say -- and you'd be right. But they've been quietly getting serious about battery materials and electrolyte synthesis, signaling a deeper breakthrough. Huawei's 3,000 km Solid-State EV Battery: Is It the Game Changer? Huawei has filed a patent for a new type of solid-state electric vehicle (EV) battery that could significantly change the future of clean transportation. The technology promises a driving range of up to 3,000 kilometers on a single charge and ultra-fast charging in just five minutes. Huawei has developed solid-state battery tech that could make EVs go further and charge faster. Cells have triple the energy-density of li-ion ones and could theoretically give an 1,800-mile range. Huawei Patents An EV Battery Pack With 3,000km Among them is Huawei, which has patented a sulfide-based solid-state battery capable of delivering driving ranges of up to 3,000km and ultra-fast charging in just five minutes. Huawei's 3,000km solid-state battery patent with 5-minute charge Huawei has stepped up its ambitions in advanced energy storage with a patent for a sulfide-based solid-state battery that offers driving ranges of up to 3,000 kilometres and ultra-fast charging. China's tech giant claims 1,800-mile range for solid-state EV battery Huawei promises that its battery technology could deliver around 1,864 miles of range and achieve a 10% to 80% charge in under five minutes.
