

Integrated Power Storage

Energy Storage Battery storage is an essential part of our clean-energy future. It can help to integrate renewable generation resources, like solar, into our energy system to strengthen it for years to come. Strategic Guide to Deploying Energy Storage in NYC While it is possible to site pumped storage outside the city, the power generated would need to be connected to the city through transmission lines. Existing transmission into the city is already Integrated Power Services - Your power partner for operating IPS is your power partner for operating reliability.
