

## Kazakhstan Electric Power Plant Group Power Generation

Ministry of Energy works out measures plan for As of today, 220 power plants are operating in the country, including 144 RES facilities with a total capacity of 2.8 GW. At the same time, 16 additional RES facilities with a capacity of 495.6 MW were Kazakhstan Electric Power Industry Key Factors Electricity in Kazakhstan is generated by 233 power plants of various forms of ownership. As on 01 January the total installed capacity of power plants in Kazakhstan Kazakhstan's power system : options for developmentCoal powers 66 percent of Kazakhstan's electricity and is responsible for 40 percent of its emissions, yet current plans to grow renewables to 25 percent by would cut power sector Kazakhstan to Build New Power Generation FacilitiesOn March 5th, the Minister of Energy, Almasadam Satkaliev reported that under the new plan, scheduled to run until , existing power generating facilities are to be modernized alongside the commission of Developments in the energy sector of the Republic of Construction of 500 kV switchgear at Karabatan substation with installation of 3\*167 MVA autotransformer and shunt reactor, Controlled shunt reactors. Expansion of 500kV Ulke Kazakhstan Electricity Market - Project The last five years had been a period of restoration for the plant - several units were overhauled and the average growth rate of generation was 23.7%. The station provides electricity to the energy deficient zones of the Kazakhstan Targets 26 GW Energy Expansion by Integrating renewable and alternative energy sources alongside gas generation is expected to reduce Kazakhstan's reliance on coal. By , Kazakhstan will offset 44 million tons of carbon dioxide Kazakhstan to fully provide itself with electricity through In order to ensure reliable power supply to the economy and population of the country, the next few years will see the gradual commissioning of new power capacities and Ministry of Energy works out measures plan for electric power As of today, 220 power plants are operating in the country, including 144 RES facilities with a total capacity of 2.8 GW.
