

## Mongolia Energy Storage Battery Series Company

In December, People's Holding Group registered and established Inner Mongolia Zhongtong Energy Co., Ltd. in Kundulun District, mainly producing 10GW composite metal colloidal energy storage systems, energy storage batteries, pack production lines, and related auxiliary equipment manufacturing. PowerChina begins construction of 1GW/6GWh. This project is a vital part of Inner Mongolia's integrated "Wind - Power - Hydrogen - Storage" strategy. It will support the Autonomous Region in achieving its goal of attaining more than 50% renewable energy. Works begin on 1.4 GWh Inner Mongolia project. Billed as the largest single-capacity energy storage station under construction in China, the project is expected to be connected to the grid by the end of this year. Introduction of Mongolia's First Utility-Scale Energy Storage Project aims to install a large-scale advanced battery energy storage system (BESS) in Mongolia's Central Energy System (CES) grid. Construction of Mongolian BESS begins - Batteries International. The battery storage power station will be built on a five hectare area and have a capacity of 50MW, an energy storage capacity of 200MWh, and an electrical frequency of 50Hz. \*\*Inner Mongolia Launches \$3 Billion 10GW Energy Storage. In December, People's Holding Group registered and established Inner Mongolia Zhongtong Energy Co., Ltd. in Kundulun District, mainly producing 10GW composite B. BILGUUN: THE NEW BATTERY ENERGY. As part of our project, an international open tender was conducted to select a contractor responsible for designing, supplying, constructing, and implementing an 80 MW power and 200 MWh energy storage system. Inner Mongolia: 1GW/6GWh! World's Largest. On June 26, the 1,000 MW / 6,000 MWh power-side energy storage project in Chayou Zhongqi, Ulanqab City, Inner Mongolia officially commenced construction. The project is currently one of the largest PV Solar Power Plant and Battery Energy System. This project is the first solar power generation project with battery energy storage system in Mongolia attached, which was awarded to the JGC Group in consortium with NGK Insulators (Japan) and MCS International. Mongolia: Baganuur 50 MW Battery Storage. "As part of the construction, a battery station, substation, overhead power line, and an extension to the Baganuur substation will be completed. The first batch of energy storage batteries has already been installed. Ulaanbaatar Energy Storage Company: Powering Mongolia's Future. When you think of Ulaanbaatar Energy Storage Company, imagine a tech-savvy nomad harnessing Mongolia's wild winds and relentless sun. This isn't just about PowerChina begins construction of 1GW/6GWh BESS project. This project is a vital part of Inner Mongolia's integrated "Wind - Power - Hydrogen - Storage" strategy. It will support the Autonomous Region in achieving its goal of attaining more than 50% renewable energy.
