

## Montenegro's first energy storage project connected to the grid

The utility is procuring two grid-scale battery storage systems to the tune of EUR 48 million (\$55.9 million). EPCG, Montenegro's largest electricity provider, is investing in two four-hour battery energy storage systems (BESS) to strengthen grid resilience and balance supply and demand. The utility is procuring two grid-scale battery storage systems to the tune of EUR 48 million (\$55.9 million). EPCG, Montenegro's largest electricity provider, is investing in two four-hour battery energy storage systems (BESS) to strengthen grid resilience and balance supply and demand. Each EPCG's latest project aims to address these gaps, positioning battery storage as a cornerstone of grid modernization and a critical tool for achieving national sustainability targets. Montenegro's energy landscape reflects a blend of historical reliance on hydropower, particularly through Elektroprivreda Crne Gore, owned by the Government of Montenegro, has held discussions with several companies and financiers from the region, Europe, and the world about its project for battery energy storage systems. Elektroprivreda Crne Gore (EPCG) said in September that it started the State-owned utility Elektroprivreda Crne Gore (EPCG) has launched an international tender for two commercial and industrial energy storage installations, each designed to deliver 30 MW of power and store up to 120 MWh of energy. The two four-hour battery storage projects will be located at the EPCG Montenegro's state-owned power company, Elektroprivreda Crne Gore (EPCG), is pioneering the installation of battery energy storage systems (BESS) to enhance energy system efficiency and support renewable energy integration. Main Content: Elektroprivreda Crne Gore (EPCG), the largest state-owned Montenegro's power utility, Elektroprivreda Crne Gore (EPCG), is preparing to open a significant tender for the procurement of battery energy storage systems (BESS) with a total capacity of 240 MWh. This initiative is part of the country's broader strategy to enhance its energy infrastructure and Montenegro utility launches 240 MWh battery EPCG, Montenegro's largest electricity provider, is investing in two four-hour battery energy storage systems (BESS) to strengthen grid resilience and balance supply and demand. How Will Montenegro's New Battery Systems Boost Energy Grid? Looking back, the implementation of EPCG's battery energy storage systems stood as a landmark achievement in Montenegro's quest for a modernized and sustainable energy grid. Montenegro's EPCG discussed BESS project with Elektroprivreda Crne Gore, owned by the Government of Montenegro, has held discussions with several companies and financiers from the region, Europe, and the world about its project for battery energy Montenegro Launches 240 MWh Battery Energy Storage Montenegro invests EUR48M in 240 MWh battery energy storage systems to enhance grid stability and accelerate its renewable energy transition. Montenegro's First Battery Energy Storage Systems Montenegro's state-owned power company, Elektroprivreda Crne Gore (EPCG), is pioneering the installation of battery energy storage systems (BESS) to enhance energy Montenegro's EPCG Set to Launch Major Battery EPCG will open a tender for 240 MWh of battery energy storage systems. The BESS will be installed at multiple locations, including hydro and thermal power plants. The tender was initially expected to Montenegro: EPCG launches development of battery energy This project aligns with global trends in sustainable energy development and reducing carbon emissions. By
