

Multiple container outdoor power supplies

How many power supplies can be mounted in a 40ft container?Power supplies <300kW can be mounted in only a single 40ft container, while greater powers can be achieved in multiple containers and connected upon delivery. Depending upon specifications, containerized power supplies may be stacked, or located side-by-side. Setup and testing or shut-down and packing can be achieved within a matter of days. What types of power supplies can be provided?A wide range of high voltage, CW DC, pulsed or modulated waveform outputs can be provided. The entire system is made to be entirely weatherproof. Power supplies <300kW can be mounted in only a single 40ft container, while greater powers can be achieved in multiple containers and connected upon delivery. How many watts can a RPS container hold?RPS packages up your shipping container with all of your batteries, power components, mounting etc. safety tucked away inside the container itself. 20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. What type of container does RPS use?RPS sources "one trip" containers (used for only a single trip overseas, very little wear, newer floors) and "watertight" containers retired after 10 years (may have some dents and welds but the container is watertight with a lot of life in it!). You have the option to choose which type of sourced container you'd like.
