What is a microinverter solar system? Typically, microinverters are "distributed" inverters. Solar PV systems with microinverters have a small inverter installed for each individual solar panel. Instead of sending energy from every panel to a single inverter, microinverters convert the DC energy to AC energy on the roof itself.

What is a string inverter? String inverters are standard centralized inverters. Usually, a majority of small solar systems use string inverters or "centralized" inverters. In a solar PV system that comes with a string inverter, all the solar panels are connected together into "strings."
