

## Off-grid inverter maximum input voltage

EG4#174; 12000XP OFF Each MPPT has 2 paralleled inputs that support up to 12kW usable PV (14kW max input), for a total of 24kW usable PV (28kW max input) when both MPPTs are utilized. What is the maximum input voltage for an off grid DC to AC inverter?For small to medium-sized off-grid inverters, the maximum input voltage can range from around 48 volts to 150 volts. These inverters are often used in residential off-grid systems, powering Off Grid Solar Inverter The Maximum PV input voltage can reach 500V and MPPT voltage range is 90~430Vdc, built-in two MPPTs solar charge controller, which can help customers make full use of solar energy.
