Understanding solar costs means looking beyond sticker prices. Right now, systems average about \$2.53 per watt before incentives. But this number varies depending on your location, roof characteristics, and the equipment you select. Take control of your energy costs with solar power. Solar panels generate "free" electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in . That price effectively drops to \$19,873 While the basic components of any rooftop solar system -- panels, inverters and optional batteries -- stay the same, the overall cost of solar panels can be different for each home. When calculating the overall cost, you need to take a look at the size of the system, the cost of labor and With utility rates rising and the 30% solar tax credit going away at the end of the year, installing solar in offers more cost-savings potential than ever before. So, what's standing in the way of American homeowners and solar panels?
