

Russia is bidding for 5G communication base stations

Russia allocates over 630 mln rubles for development of 4G/5G base stations Oct 9, 2023. One of its threads calls for the development of 4G/5G mobile communication base station equipment with OpenRAN open architecture, the signed order, which was posted on Russian government eyes 5G pilot for Dec 16, 2023. In January of last year, Russian telecom operators entered into forward contracts with domestic manufacturers for the supply of base stations, including a plan for the supply of equipment for 5G networks for Russia. Plans to Produce Domestically Produced 5G Base Stations Feb 7, 2023. Last August, Russia released a draft communication development strategy. The draft states that by 2025, all cities with a population of over 100,000 will use domestically produced 5G. Major Russian cities plan to begin actively deploying 5G Dec 21, 2023. Active deployment of 5G networks at domestic base stations will begin in large Russian cities in 2024. The deployment of advanced Private LTE and 5G technologies helps. The presence of 5G in Russia has been postponed - the Oct 23, 2023. The auction of domestic fifth generation communication network (5G) frequencies will not be held until 2025. Kommersant Roskomnadzor wrote about this, referring to the words "Russia 5G Plan: From Million-Cop Cities to Nationwide Access" Oct 16, 2023. Russia is accelerating its 5G rollout with plans to install domestic base stations in cities exceeding one million residents by 2025. This shift comes from statements reported by Russia's Digital Ministry plans pilot 5G launch Mar 8, 2023. Russia has fallen far behind in the 5G race due to sanctions following its invasion of Ukraine. High-profile network equipment vendors Ericsson and Nokia have left the country. Development of 5G networks in Russia. We are talking about the possibility of using both Russian and international cryptographic algorithms in public communication networks 5G/IMT-. Besides the Ministry of Digital Development, Minpromtorg will take part in Russia: National 5G Infrastructure Rollout and Feb 4, 2023. Russia announced its plan to deploy 5G network in 16 cities by the year 2025, with the infrastructure development expected to start from 2024. This initiative will support a population of about 16 to 17 million. Russia will start deploying 5G networks in major cities in Dec 20, 2023. Active deployment of 5G networks at domestic base stations will begin in large Russian cities in 2024, Russian Minister of Digital Development Maksut Shadayev, told reporters.
