What is a 12V inverter? A 12V inverter is an electronic device that converts 12V DC power into 220V AC power. This type of inverter is typically used to convert automotive or other 12V DC power sources into standard household or industrial power to power a variety of devices. Inverters provide inverters from 300W to 3000W. What type of power does a power inverter use? In many off-grid or mobile power scenarios, standard household appliances require AC (alternating current) power, but most batteries and vehicle power systems provide DC (direct current) power at 12 volts. This is where a power inverter comes in.
