

Serbia Wind, Solar and Energy Storage Power Generation Project

Serbia revises energy infrastructure plan, prioritizing solar over wind. It covers projects across six sectors: electricity generation, transmission network, distribution network, natural gas, oil and petroleum products, and energy efficiency. The Serbia energy storage options Serbia plans to build solar power plants, wind farms, and pumped-storage hydropower plants, but also gas-fired power plants, energy storage batteries, and hydrogen facilities, in order to Serbia Solar and Storage Project | UGT Renewables UGT Renewables is working with Serbia's EPS to provide a series of self-balanced utility-scale solar projects, including battery storage, to every corner of Serbia. Serbia signs deal for 1 GW of solar, 200 MW of battery storage Serbia currently gets more than 60% of its electricity from fossil fuels. The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year, Fortis Energy Launches 110 MWp Solar + Storage Project in Serbia This hybrid solar and storage project represents a strategic investment aimed at enhancing grid reliability, integrating renewable energy, and reducing dependence on fossil fuels. Energy transition in Serbia: Strategic plans for sustainable power Beyond hydroelectric, wind, solar and gas power plants, Serbia also plans to harness geothermal energy, biomass, biogas, hydrogen and expand the use of electric power. Factsheet: Renewable Energy in Serbia The possibility of becoming a prosumer will be facilitated by the new renewable energy sources bill adopted in early 2021, making net-metering possible and adding a fast-track for Fortis Energy to build 110-MWp solar-storage plant. Earlier in April, Fortis Energy announced that it would install 20 wind turbines in Jagodina and Rekovac as part of its 144-MW Juhor Wind Power Plant project in central Serbia. That project is currently under construction. Serbia to add 138 MW in solar, wind in 2022. The solar and wind fleet in Serbia is expected to expand by 138 MW in 2022, with 76 MW in wind farms and 62 MW in solar power plants, according to the country's energy strategy. Serbia revises energy infrastructure plan, prioritizing solar over wind.
