

## Solar Energy Buyer System

Why should you buy a solar-powered home? How exciting! Owning a solar-powered home can help you save on your energy bills, reduce greenhouse gas emissions, and be more energy independent. And thanks in part to investments from the Solar Energy Technologies Office, the cost of solar energy is coming down every year. What does a solar service provider do? The solar services provider purchases the solar panels for the project from a PV manufacturer, who provides warranties for system equipment. The installer will design the system, specify the appropriate system components, and may perform the follow-up maintenance over the life of the PV system. How can solar energy help you save money? In order to harness the power of the sun and turn it into electricity, homeowners can install solar panels and other components to create a solar energy system. By doing this, you can reduce your use of the power grid, your monthly electricity costs, and your ecological footprint. What is a solar power purchase agreement? Adapted from Rahu Institute's "The Customer's Guide to Solar Power Purchase Agreements" (). A host customer agrees to have solar panels installed on its property, typically its roof, and signs a long-term contract with the solar services provider to purchase the generated power. How much does a solar system cost? If you just need a few panels for a small do-it-yourself solar project, expect to pay around \$200 to \$350 per panel (between \$0.80 and \$1.40 per watt). Note: The table below doesn't include the cost of a solar storage battery, which can add anywhere from \$7,000 to \$18,000 to your total solar system costs. How much does a solar system cost in ? Solar panels generate "free" electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in . That price effectively drops to \$19,873 after considering the full federal solar tax credit. 7 Best Solar Companies in Virginia ( Top Solar Installers) With so many solar companies to choose from, we know how daunting it can be to find an installer you can trust with your home's solar system.
