

## Solar Panel Industry City Agent

Why should a business invest in solar energy? As a business, investing in solar energy is a significant investment. It helps you achieve your maximum return target for energy investment. We offer commercial and residential services in New York and New Jersey. In addition to the highest quality solar service, we also provide free energy services and efficiency evaluations. What does a solar developer do? The solar developer bills the businesses for the energy generated by the solar panels, which is less than what the local utility company would charge. Core Development Group serves all of New York, including upstate, downstate, New York City, and Long Island. What financial options are available for commercial solar systems? A variety of flexible financial options are available for NY-based commercial solar systems, including Power Purchase Agreements (PPA). A power-purchase agreement is unlike outright ownership, as organizations (businesses, municipalities, educational institutions) play host to a solar array owned and operated by someone else. Can you get incentives to install solar on your property? On-site solar: Homes, businesses, multifamily buildings, and municipalities can get incentives to install rooftop or ground-mounted solar on their property to generate their own renewable energy. Do solar installers need a certification? Certifications aren't necessarily required, but are a great way to weed out lower quality installers. The North American Board of Certified Energy Practitioners (NABCEP) offers an industry-leading certification program, while the PV Installation Professional (PVIP) Board Certification is the gold standard for solar installers. Do solar companies rely on subcontractors? Some solar companies rely on subcontractors to perform some-or all-the work during your solar installation. Don't let this put you off: It's entirely standard procedure in the industry. What is alarming, though, is a lack of transparency from installers about who will install your system and why they use subcontractors.
