

## Solar System News

Will a new astronomer find millions of new Solar System objects? June 3, -- Astronomers have revealed new research showing that millions of new solar system objects are likely to be detected by a brand-new facility, which is expected to come online later this June 3, -- Scientists have identified a new source of energetic particles near the Sun. Could new Solar System objects be detected by a new facility? Sorcha.space/University of Washington A group of astronomers from across the globe, including a team from the University of Washington and led by Queen's University Belfast, have revealed new research showing that millions of new solar system objects will be detected by a brand-new facility, which is expected to come online later this year. How many planets are in the Solar System? Solar System Planets. Astronomy articles on the eight planets, plus the two dwarf planets, Pluto and Eris. Great pictures of everything in the solar system. Updated daily. Will a new telescope expand the knowledge of the Solar System? Researchers from the UW and Queen's University Belfast believe that knowledge of the objects in the solar system will expand exponentially when a new telescope comes online later this year. Solar System News - Solar System Planets. Astronomy articles on the eight planets, plus the two dwarf planets, Pluto and Eris. Great pictures of everything in the solar system. Updated daily. Astronomer Suspects Mysterious Object Is Up to No Good While Interstellar object 3I/ATLAS is expected to reach its perihelion, or the closest point to the Sun in its highly eccentric path through our solar system, on October 29. Earlier this week, it Solar System News | From Mercury to Mars to Pluto Learn the latest about the exploration of our neighbors in the solar system, and check out stunning pictures of Mars, asteroids, Jupiter's moons, and more. NASA confirms that mysterious object shooting NASA scientists have confirmed that a mysterious object shooting toward us through the solar system is an "interstellar object" -- only the third of its kind ever seen. Experts have also given Comet 3I/ATLAS reaches perihelion Comet 3I/ATLAS reaches perihelion, begins solar transit Now hidden from Earth, the comet is being monitored by a fleet of interplanetary spacecraft during its closest approach to the Sun. Intelligent visitor or interstellar rock? 3I/ATLAS The mystery of whether a Manhattan-sized object whizzing through the solar system is an alien probe or simply a comet may be finally solved this week. Millions of new solar system objects to be found and 'filmed in Researchers from the UW and Queen's University Belfast believe that knowledge of the objects in the solar system will expand exponentially when a new telescope comes online later this year.
