

Solar panel production cuts

Right now, U.S. manufacturers do not produce enough solar panels to meet the nation's demand, but industry investments and federal tax incentives have been making progress, though recent federal moves have created uncertainty. On July 4, President Trump signed the "One Big Beautiful Bill." The bill makes steep cuts to solar energy and places new restrictions on energy tax credits that will slow the deployment of residential and utility-scale solar while undermining the growth of U.S. manufacturing. SEIA has outlined the American manufacturers saw tariffs on imported solar components as a victory but warned that legislation in Congress threatens any potential benefits to industry.
