

Thailand Outdoor Power Supply

What type of power outlet does Thailand use? Thailand uses power outlets and plugs of types A, B, C & O. Take a look at the pictures below to see what these plugs and power sockets look like: Doesn't look familiar? Do the outlets look different in your country? You'll need a power plug adapter. Type A - Mostly used in the US, Canada, Mexico, Central America, China and Japan. What type of plug & socket is used in Thailand? In the past, Thailand conformed to the American plug and socket standard (types A & B), which, from a safety perspective, was not the wisest choice. After all, type A and B plugs are supposed to be connected to power outlets that supply between 100 and 127 volts and wall sockets in Thailand operate at 230 volts. What is the voltage in Thailand? Just like most of the world, the voltage in Thailand is 230 volts and the frequency is 50 Hz. In the past, Thailand conformed to the American plug and socket standard (types A & B), which, from a safety perspective, was not the wisest choice. What do Thailand's electrical outlets look like? When you are going on a trip to Thailand, be sure to pack the appropriate travel plug adapter that fits the local sockets. But what do those electrical outlets look like? In Thailand, types C and O are the official standards. American type A & B plugs can also be used, but their compatibility is going to be phased out in the long term. What voltage should a Thai wall socket be plugged into? This means that imported appliances, equipped with type A or B plugs, require a voltage between 100 and 127 V and will be damaged (or even catch fire) when they are plugged into a Thai wall socket. That is, unless they are dual voltage of course. Can you use American plugs in Thailand? In the long run, compatibility with American plugs is planned to be phased out, since the electrical network in Thailand operates at 230 V. For now, type O outlets only exist on paper. All sockets that are currently sold are hybrid ones, which are compatible with types plug types A, B, C and O.
