

The largest double-sided double-glass module

The new double-sided n-type Silk Nova Duetto high efficiency glass/glass panel with 132 half-cut cells, with a power range from 615 to 625 Watts, completes the FuturaSun model range. Thanks to its double-sided n-type cells, the Silk Nova Duetto module also converts reflected light from the rear. Their dual-glass structure ensures superior durability, extends system lifespan, and reduces maintenance costs. With glass-glass modules, you benefit not only from enhanced efficiency but also from a stable and long-lasting return on investment. Excellent protection against corrosion and mechanical stress. At IBC SOLAR, we use 2,0 mm x 2,0 mm glass layers, whereas some other market offerings use thinner 1,6 mm x 1,6 mm layers. This ensures greater durability and longevity. Generally, the front and back glass layers in these modules have the same thickness, contributing to their balanced structural design. Trina Solar's DUOMAX 72-cell Modules offer a revolutionary frameless, dual-glass design for rooftop and ground-mount solar installations. With lower degradation rates and higher annual and lifetime energy production that is ~25 percent higher than traditional framed modules, the DUOMAX's enhanced DAS Solar is always a faithful companion where there is light. Our industry-leading module power contributes to a conversion efficiency of 23.2%. Bifacial ratio reaches 80%, 30% more module power generation than conventional modules. Two-sided double-glazed modules, symmetrical structural design. There has recently been a worldwide trend to put glass on both sides of the panel and the name given is known as double glass solar panels. These are known as Double-Glass designs (solar panels with double glass or glass solar panels). The double glass module, as the name implies, is a construction. Silk Nova Duetto The new double-sided n-type Silk Nova Duetto high efficiency glass/glass panel with 132 half-cut cells, with a power range from 615 to 625 Watts, completes the FuturaSun model range. Double glass solar module | Maysun Solar Double glass modules use an innovative design with glass on both sides, offering higher photovoltaic conversion efficiency and better environmental characteristics. Double the strengths, double the benefits. Dual-sided energy Capture: Many double glass modules are bifacial, allowing them to harness sunlight from both sides. This can lead to energy gains of up to 25%, especially when installed over reflective surfaces. Durable Frameless Dual-Glass Panels for Ground Trina Solar's DUOMAX 72-cell panels combine a frameless, dual-glass design for ground-mount installations with high efficiency, performance, and reliability in harsh climates. What are Double Glass Solar Panels? Double-glass solar modules are made up of two layers of tempered glass that cover both sides of the solar panel. As snow accumulates on a typical solar panel or people stomp on it (during DAH Solar Full-Screen Double-Glass PV Module: The Preferred It is the first double-glass PV module in the industry that has no frames on all four sides of the front. The global patent no-frame structure design allows the module to be anti-dust and no 630w double-sided double-glazed photovoltaic module 630W double-sided double-glazed PV module adopts high-efficiency monocrystalline silicon cells with double-sided power generation capability, featuring high transmittance, long service life. Silk Nova Duetto The new double-sided n-type Silk Nova Duetto high efficiency glass/glass panel with 132 half-cut cells, with a power range from
