

pack battery IC

Battery Protection ICs for Multi-cell Pack Our vast product lineup provides strong support for developing safety-critical battery packs with secondary protection and other features to suit customer needs such as smaller, lighter, and thinner applications and the cascade Battery Management IC The STBC02 and STBC03 battery-charger management chips improve integration without compromising performance and power consumption. They combine a linear battery charger, a 150 mA LDO, two SPDT switches and AP9101C Li+ Battery Protection IC Diodes' AP9101C is a protection solution developed for lithium-ion and lithium-polymer rechargeable batteries with a high-precision voltage detection circuit. Battery Charger ICs | Analog Devices Analog Devices offers broad portfolio of battery charger IC devices for any rechargeable battery chemistry, including Li-Ion, LiFePO₄, lead acid, and nickel-based, for both wired and wireless ISL94202 The ISL94202 is a battery pack monitor IC that supports from three to eight series connected cells. It provides complete battery monitoring and pack control. The ISL94202 provides automatic shutdown and recovery from Mitsumi Battery Protection IC Mitsumi is the leading manufacturer of single cell battery protection ICs, and also offers a wide range of products for multi-cell to fit any battery pack specifications. Search and filter your product using the dropdown above. Lithium-ion Battery Protection ICs We offer a diverse lineup of approximately 2,100 battery protection ICs covering a wide range of cell counts, applications and protection functions. ABLIC also provides strong support for safety-oriented battery pack AP9101C: Li+ Battery Protection IC for Single Cell Pack (AP9101C) The AP9101C provides a function to protect batteries by detecting overcharge voltage, overdischarge voltage, overcharge current, overdischarge current and other abnormalities and Battery management ICs | TI Our battery management portfolio includes chargers, gauges, monitors and protection ICs that can be used in industrial, automotive and personal electronic applications. Battery Protection ICs for Multi-cell Pack Our vast product lineup provides strong support for developing safety-critical battery packs with secondary protection and other features to suit customer needs such as smaller, lighter, and Battery Management IC The STBC02 and STBC03 battery-charger management chips improve integration without compromising performance and power consumption.
